DELAWARE STATE SENATE

146th GENERAL ASSEMBLY

SENATE BILL NO. 124 AS AMENDED BY SENATE AMENDMENT NO. 1

AN ACT TO AMEND TITLE 26 OF THE DELAWARE CODE RELATING TO DELAWARE'S RENEWABLE ENERGY PORTFOLIO STANDARDS AND DELAWARE-MANUFACTURED FUEL CELLS.

BE IT ENACTED BY THE GENERAL ASSEMBLY OF THE STATE OF DELAWARE:

Section 1. Amend § 352, Title 26 of the Delaware Code by redesignating subsections (16) through (24) as subsections (18) through (26) respectively, and inserting new subsections (16) and (17) as follows:

- "(16) "Qualified Fuel Cell Provider" means an entity that
- a. By no later than the commencement date of commercial operation of the full nameplate capacity of a fuel cell project, manufactures fuel cells in Delaware that are capable of being powered by renewable fuels, and
- b. prior to approval of required tariff provisions, is designated by the Director of the Delaware Economic Development Office and the Secretary of DNREC as an economic development opportunity.
- (17) "Qualified Fuel Cell Provider Project" means a fuel cell power generation project located in Delaware owned and/or operated by a Qualified Fuel Cell Provider under a tariff approved by the Commission pursuant to § 364 (d) of this title.".
- Section 2. Amend § 353, Title 26 of the Delaware Code by inserting new subsections (c) and (d) to read as follows:
- "(c) The Commission shall develop rules to transition the REC and SREC procurement responsibility set forth in Section 354 (e) of this subchapter. The purpose of such rules shall be:

Page 1 of 9

SD: TGW: rma:2381460095 LC: JWH: RAY:0661460070 (1) to adequately protect electric suppliers that entered into contracts to provide RECs and SRECs to retail

electric customers prior to the transition of REC and SREC procurement responsibility under Section 354(e) of this

subchapter,

(2) to adequately protect against overpayment of the cost of RPS obligations for customers of electric

suppliers who are parties to supply contracts that were entered into prior to the transition of REC and SREC

procurement responsibility under Section 354(e) of this subchapter, and

(3) to adequately protect Commission-regulated electric suppliers and customers thereof from having to incur

alternative compliance payments or other costs that would have been avoided but for the failure of an electric supplier

to continue retiring RECs or SRECs associated with its retail supply contracts existing at the time of the transition of

REC and SREC procurement responsibility under Section 354(e) of this subchapter. To the extent such protection

involves a temporary reduction to the RPS obligation or to the price of an alternative compliance payment required of

a Commission-regulated electric supplier made necessary by the failure described above, the Commission is

authorized to make the necessary temporary reductions notwithstanding the RPS obligations otherwise required by

this chapter.

(d) The Commission shall develop procedures for tracking the generation output of Qualified Fuel Cell

Provider Projects such that energy produced by such projects shall fulfill the Commission-regulated electric

company's State mandated REC and SREC requirements set forth in Section 354 of this subchapter as follows:

(1) fulfillment of the equivalent of 1 REC for each megawatt-hour of energy produced by a Qualified Fuel

Cell Provider Project.

a. The Commission-regulated electric company can use energy output produced by a Qualified Fuel Cell

Provider Project to fulfill a portion of SREC requirements at a ratio of 6 MWH of RECs per 1 MWH of SRECs. The

Commission-regulated electric company may utilize a portion of energy output from a Qualified Fuel Cell Provider

Project in any given year to fulfill no more than 30% of the SREC requirements unless:

1. due to lack of SREC availability in the market, the alternative would be to incur Alternative Compliance

Payments, or

2. the SREC obligations set forth in Schedule I of Section 354 of this subchapter are increased, and then

only to the extent necessary to fulfill the increased SREC obligations.

b. The Secretary of DNREC may, after coordination with the Commission and a Commission-regulated

electric company, adjust the requirements of this section including permitting a Commission-regulated electric

company participating in a Commission-approved project to exceed the percentages set forth in this section.

c. The right of a Commission-regulated electric company to use energy output produced by a Qualified Fuel

Cell Provider Project to fulfill its REC and SREC requirements in accordance with this section shall not expire until

actually applied to fulfill such requirements.

(2) The Commission-regulated electric company has the ability to apply the REC and SREC equivalent

fulfillment benefits described in this Section for 20 MW in addition to the 30 MW set forth in § 364 of this title for

future customer sited applications of Qualified Fuel Cell Provider fuel cells. Separate tariff provisions must first be

approved by the Commission for such installations above the original 30 MW."

Section 3. Amend § 354(a), Title 26 of the Delaware Code by striking the word "sold" as it appears in the

first sentence in said subsection, and inserting the word "delivered" in its place.

Section 4. Amend § 354(d), Title 26 of the Delaware Code by inserting the phrase "the Commission-

regulated electric companies and, where applicable," immediately before "retail electricity suppliers" in the second

sentence in said subsection, and inserting the phrase "with existing contractual electric supply obligations"

immediately after "retail electricity suppliers" in the second sentence in said subsection.

Section 5. Amend § 354, Title 26 of the Delaware Code by inserting a new subsection (e) to read as follows:

"(e) Beginning with compliance year 2012, Commission-regulated electric companies shall be responsible

for procuring RECs, SRECs and any other attributes needed to comply with subsection (a) of this section with respect

to all energy delivered to such companies' end use customers.".

Section 6. Amend § 354(f), Title 26 of the Delaware Code by inserting the phrase "Commission-regulated

electric company" immediately before "retail electricity supplier" in the first sentence in said subsection, and inserting

the phrase "with existing contractual electric supply obligation" immediately after "retail electricity supplier" in the

first sentence in said subsection.

Section 7. Amend § 364, Title 26 of the Delaware Code by deleting the words "customers of" in the Section

Title.

Section 8. Amend § 364, Title 26 of the Delaware Code by designating the existing paragraph as subsection

(a) and inserting new subsections (b) through (i) as follows:

"(b) All funds disbursed to a Qualified Fuel Cell Provider Project by a Commission-regulated electric

company, including incremental site preparation costs incurred by Qualified Fuel Cell Provider Project, shall be

collected from the entire Delaware customer base of such company through adjustable non-bypassable charges which

shall be established by the Commission. A Commission-regulated electric company participating in a Qualified Fuel

Cell Provider Project shall collect and disburse funds solely as the agent for the collection and disbursement of funds

for the project and shall have no liability except to comply with the tariff provisions to be established as set forth in

subsection (d) of this section.

(c) All miscellaneous costs arising out of Qualified Fuel Cell Provider Projects incurred by a Commission-

regulated electric company, including, but not limited to, filing costs, administrative costs and incremental site

preparation costs, shall be distributed among the entire Delaware customer base of such company through adjustable

non-bypassable charges which shall be established by the Commission. Such costs shall be recovered unless, after

Commission review, any such costs are determined by the Commission to have been incurred in bad faith, are the

product of waste or out of an abuse of discretion, or in violation of law.

(d) Before a Commission regulated electric company may collect any charges on behalf of a Qualified Fuel

Cell Provider Project that would entitle the Commission-regulated electric company to reduce its REC and SREC

requirements as provided for in § 353 (d) of this title, the Commission must adopt tariff provisions applicable to such

project.

(1) Tariff provisions enabling and obligating Commission-regulated electric companies, acting in the role of

an agent for collection and disbursement, to collect charges on behalf of a Qualified Fuel Cell Provider Project shall

be proposed jointly by the electric company and the Qualified Fuel Cell Provider and shall, at a minimum, provide for

the following.

a. A project of 30 MW nominal nameplate, and future potential additions of up to an additional 20 MW

nominal nameplate, not to exceed a total of 50 MW nominal nameplate or 1,152 Megawatt Hours per day averaged on

an annual basis. The total allowable 50MW of nominal nameplate shall be reduced by any customer sited

installations referred to in § 353 (d)(2) of this title or additional installations of Qualified Fuel Cell Provider fuel cells.

Any additional MW beyond the 30MW project made pursuant to this Section and § 353 (d)(2) of this title must be

reviewed and approved by the Commission.

b. a term of service of at least 20 years from commercial operation of the completed Qualified Fuel Cell

Provider Project.

c. the cost to customers of the Commission-regulated electric company for each MWH of output produced by

the project which, on a levelized basis at the time of Commission approval, does not exceed the highest cost source

for combined energy, capacity and environmental attributes approved by the Commission for inclusion in the

renewable portfolio of the Commission-regulated electric company as of January 1, 2011.

d. adjustments to funds to be collected from customers and distributed to the Qualified Fuel Cell Provider

Project that will also compensate the Qualified Fuel Cell Provider Project for its costs of fuel to produce such output

and that will reduce compensation to the Qualified Fuel Cell Provider Project for any revenues received by the

Qualified Fuel Cell Provider Project for such output sold in the PJM or any successor market.

e. the requirement that the Qualified Fuel Cell Provider Project must sell all energy, capacity, and ancillary

services, produced by the project and any other output available or that becomes reasonably available to the Qualified

Fuel Cell Provider Project during the term of the project into the PJM or any PJM successor market. To the extent

any additional output produced by the project, including but not limited to any product or environmental attribute

from the project becomes available for sale in the PJM Market, PJM successor market, or a market other than PJM or

a PJM successor market, the Qualified Fuel Cell Provider Project and Commission-regulated electric company shall

jointly propose additional provisions to the tariff designed to reduce the cost of the Qualified Fuel Cell Provider

Project to customers of the Commission-regulated electric company.

f. the Commission-regulated electric company shall, on behalf of a Qualified Fuel Cell Provider Project,

collect from its customers, through a non-bypassable charge provided for in subsections (b) and (c) of this section,

any positive difference between the sum of (i) the price for each MWH of output produced by the project plus (ii) the

cost of fuel to produce such output plus (iii) any costs incurred by the Commission-regulated electric company arising

out of the Qualified Fuel Cell Provider Project minus the amount received by the Qualified Fuel Cell Provider Project

for the market sale of its output, and shall distribute such amount to the Qualified Fuel Cell Provider Project.

g. that the Commission-regulated electric company shall, on behalf of a Qualified Fuel Cell Provider Project,

distribute to its customers from the Qualified Fuel Cell Provider Project, through a distribution mechanism to be

established in a tariff, any positive difference between the amount received by the Qualified Fuel Cell Provider

Project for the market sale of its output minus the sum of (i) the price established for each MWH of output from the

project plus (ii) the cost of fuel to produce such output plus (iii) any costs incurred by the Commission-regulated

electric company arising out of the Qualified Fuel Cell Provider Project.

h. an average efficiency level that the fuel cells in a project must maintain.

i. a definition of the role of the Commission-regulated electric company solely as the agent of a Qualified

Fuel Cell Provider Project, for the collection of funds and disbursement of such collected funds to Qualified Fuel Cell

Provider Project and to its customers.

j. the mechanism through which the Commission-regulated electric company, on behalf of a Qualified Fuel

Cell Provider Project, shall collect from its customers, through a non-bypassable charge provided for in subsections

(b) and (c) of this section, any difference between the sum of (i) the price for each MWH of output produced by the

project plus (ii) the cost of fuel to produce such output plus (iii) any costs incurred by the Commission-regulated

electric company arising out of the Qualified Fuel Cell Provider Project minus the amount received by the Qualified

Fuel Cell Provider Project for the market sale of its output.

k. the mechanism through which the Commission-regulated electric company, on behalf of a Qualified Fuel

Cell Provider Project, shall distribute to its customers, through bill credits, any positive difference between the

amount received by the Qualified Fuel Cell Provider Project for the market sale of its output minus the sum of (i) the

price established for each MWH of output from the project plus (ii) the cost of fuel to produce such output plus (iii)

any costs incurred by the Commission-regulated electric company arising out of the Qualified Fuel Cell Provider

Project.

l. a provision that protects a Qualified Fuel Cell Provider Project from any future changes to this subchapter

that would prevent a Qualified Fuel Cell Provider Project that provides service under approved tariff provisions from

recovering all amounts approved in such tariff. Such provision shall also include the obligation of the Commission-

regulated electric company, in the event of any such change to this subchapter, to collect from its customers amounts

necessary to disburse, and to disburse to the Qualified Fuel Cell Provider Project the full amount approved by the

Commission in such pre-existing tariff for each MWH of output produced by the Qualified Fuel Cell Provider Project.

m. In the event of an event of force majeure that prevents the Qualified Fuel Cell Provider Project from

supplying output from at least 80% of the capacity of the Qualified Fuel Cell Provider Project, or an interruption in

fuel supply, in whole or in part, to the project, a mechanism through which,

1. during the event of force majeure, the Commission-regulated electric company shall, on behalf of a

Qualified Fuel Cell Provider Project, collect from its customers and transfer to the Qualified Fuel Cell Provider

Project, a maximum of 70% of the price per MWH of output affected by the event of force majeure, and during an

interruption in fuel supply, the Commission-regulated electric company shall, on behalf of a Qualified Fuel Cell

Page 6 of 9

SD: TGW: rma:2381460095

LC: JWH: RAY:0661460070

Provider Project, collect from its customers and transfer to the Qualified Fuel Cell Provider Project 100% of the price

per MWH of output affected by the interruption.

2. during the event of force majeure or interruption in fuel supply, the Commission-regulated electric

company will continue to receive the full reduction in renewable portfolio standards that would have been provided

by the output but for the event of force majeure or interruption in fuel supply.

(2) All tariff filings must be approved or denied by the Commission in whole, as proposed, without alteration

or the imposition of any condition or conditions with respect thereto by the Commission. In determining whether to

approve or deny the Tariff, the Commission shall first ensure that the provisions of Section 364 (d) (1) a.-m. of this

Title have been satisfied. In addition, the Commission shall consider the incremental cost of the Qualified Fuel Cell

Provider Project to customers, applying at least the following factors:

a. Whether the Qualified Fuel Cell Provider Project utilizes innovative baseload technologies,

b. Whether the Qualified Fuel Cell Provider Project offers environmental benefits to the state relative to

conventional baseload generation technologies,

c. Whether the Qualified Fuel Cell Provider Project promotes economic development in the State, and

d. Whether the Tariff as filed promotes price stability over the project term.

(3) A Commission-regulated electric company and Qualified Fuel Cell Provider Project may jointly modify

proposed tariff provisions prior to any final ruling by the Commission.

(4) Notwithstanding Section 306 of Title 26 or any other provision of the Delaware Code to the contrary,

any changes in rates or charges necessary to collect funds for disbursements or costs addressed in subsection 364 (a)-

(c) of this section through adjustable non-bypassable charges shall become effective thirty (30) days after filing,

absent a determination of manifest error by the Public Service Commission. The Commission may allow changes in

rates or charges related to such adjustable non-bypassable charges to become effective less than thirty (30) days after

filing under such conditions as it may prescribe.

(5) Once approved by the Commission, such tariff provisions cannot be altered, nor may approval be

repealed or modified, without the agreement of both the Commission-regulated electric company and the Qualified

Fuel Cell Provider Project except that revisions to tariffs may be proposed by the Commission-regulated electric

company alone where:

a. Such revisions have no adverse effect on the Qualified Fuel Cell Provider Project, and

b. Such revisions are for the purpose of complying with subsection (c) of this section.

(e) For purposes of this Subchapter, all fuel cell units of a Qualified Fuel Cell Provider Project under tariff

with a Commission-regulated electric company shall be considered to have been manufactured in Delaware as long

as:

(1) By no later than the second anniversary of commercial operation of the full nameplate capacity of a fuel

cell project, or December 31, 2016, whichever is earlier, either (i) at least 80% of the installed nameplate capacity

shall have been sourced from fuel cell units manufactured in a permanent manufacturing facility located in the State

or (ii) no more than ten megawatts of nameplate capacity from a fuel cell project shall be manufactured outside of the

State, and

(2) Fuel cell manufacturer has executed an agreement with the Delaware Economic Development Office that

a termination payment shall be made by the fuel cell manufacturer in the event that it ceases manufacturing operations

in the State.

(f) Notwithstanding any other provision of the Delaware Code to the contrary, amounts due to the Qualified

Fuel Cell Provider Project and amounts collected by the Commission-regulated electric company on behalf a

Qualified Fuel Cell Provider Project as a result of a Qualified Fuel Cell Provider Project, and any other costs incurred

by a Commission-regulated electric company addressed in Sections 364 (a) through (c) of this title shall constitute

revenue property when, and to the extent that, a tariff authorizing the revenue charges have become effective in

accordance with this section, and the revenue property shall thereafter continuously exist as property for all purposes

with all of the rights and privileges of this section for the period and to the extent provided in the tariff, but in any

event until the end of the term of service of the Qualified Fuel Cell Provider Project.

(g) Notwithstanding any other provision of the Delaware Code to the contrary, any requirement under this

section or a tariff under this section requiring that the Commission take action with respect to the subject matter of a

project under this section shall be binding upon the Commission, as it may be constituted from time to time, and any

successor agency exercising functions similar to the Commission and the Commission shall have no authority to

rescind, alter, or amend that requirement in a subsequent order except as provided in this chapter.

(h) Notwithstanding any other provision of the Delaware Code to the contrary except as otherwise provided

in this chapter, with respect to revenue property, the tariffs with respect to disbursements and costs arising out of the

Qualified Fuel Cell Provider Project and recovery of costs addressed in Sections 364(a) through (c) of this title shall

be irrevocable and the Commission shall not have authority either by rescinding, altering, or amending the tariff

provisions or otherwise, to revalue or revise for ratemaking purposes the disbursements and costs arising out of the

Page 8 of 9

SD: TGW: rma:2381460095

Qualified Fuel Cell Provider Project, or the costs of recovering such costs, determine that the disbursements and costs

of the Qualified Fuel Cell Provider Project are unjust or unreasonable, or in any way reduce or impair the value of

revenue property either directly or indirectly by taking project revenue amounts, disbursements or costs arising out of

the Qualified Fuel Cell Provider Project into account when setting other rates for the Commission-regulated electric

company; nor shall the disbursements, amount of revenues or costs arising with respect thereto be subject to

reduction, impairment, postponement, or termination. Except as otherwise provided in this section, the State of

Delaware does hereby pledge and agree with the owners of revenue property and the Commission-regulated electric

company as the agent for collecting and disbursement on behalf of a Qualified Fuel Cell Provider Project and in

collecting costs incurred by the electric company addressed in Sections 364(a) through (c) of this title that the State

shall neither limit nor alter the revenue property and all rights thereunder until the obligations, are fully met and

discharged, provided nothing contained in this section shall preclude the limitation or alteration if and when adequate

provision shall be made by law for the full recovery by the Qualified Fuel Cell Provider Project and the Commission

regulated electric company.

(i) Notwithstanding Section 201 of Title 26 or any other provision of the Delaware Code to the contrary, the

courts of this State shall have exclusive original jurisdiction over any dispute between a Qualified Fuel Cell Provider

Project and a Commission-regulated electric company involving the interpretation of the obligations between them as

contained in Commission approved tariffs required by Section 364 (d) of this subchapter.".

Section 9. This Act shall be effective as of the date of its enactment.
