SYNOPSIS

State economic development officials pursue economic development opportunities that, if realized, would have significant impact on Delaware's future economic health and competitiveness. Such situations frequently require expeditious action and the need to enhance Delaware's transportation infrastructure on a timeline and schedule that is outside the 6 year Capital Transportation Program.

To meet these challenges, this Act establishes the Transportation Infrastructure Investment Fund to provide economic assistance for renovation, construction, or any other type of improvements to roads and related transportation infrastructure in order to attract new businesses to Delaware, or for the expansion of existing Delaware businesses, when such an economic development opportunity would create a significant number of direct, permanent, quality, full-time jobs.
