SYNOPSIS

This Act adds an additional classification for surgical hospitals. House Bill No. 91 adopted by the 150th General Assembly (82 Del. Laws c. 73) revised the statutory definition of hospital and classified hospitals as either General, Long-term care, Psychiatric, or Rehabilitation. The existing classifications do not include surgical hospitals, those specialized hospitals providing surgical services at a level of care higher than freestanding surgery centers but whose patients do not require all of the services provided by "General" acute care hospitals. This Act will allow the Department of Health and Social Services to license and regulate surgical hospitals providing inpatient and outpatient surgical services to patients whose duration of stay is not expected to exceed 72 hours.

This Act also makes technical corrections to existing law to make it consistent with the Legislative Drafting Manual.
